

Hyperrealistic eyebrow look with more volume.

I studied software engineering in Iran and I always tried to teach others what I have learned. Even though I had a degree in computer engineering from a Dutch university, I decided to start with a field that would earn me more. I decided to join the PHI family and worked hard and unstoppable to reach my goal, and I'm finally there. Now after a few years I have achieved all my wishes and I have more than thousands of successful students.

What are **BoldBrows?**

Thick and full eyebrows are the dream of many women around the world. Fortunately for those who have sparse eyebrows and cannot naturally achieve this look, BoldBrows treatment provides a hyper-realistic eyebrow look.

What is BoldBrows training?

BoldBrows training is a special education at Phi Academy that allows all Students to acquire advanced knowledge of drawing eyebrows using special strokes that combine curved and braided hairs with short hairs and thus form the effect of greater eyebrow volume.

How long Does BoldBrows training last?

BoldBrows training begins with the two-day live training that consists of two parts:

DAY 1

Theoretical part: how to prepare the client, what BoldBrows course includes, a course on hygiene, color theory, face anatomy, appropriate care after treatment.

DAY 2

Practical part: practicing on a live model.

What After?

After the live training, participants gain access to the Craftmaster online learning platform, where all registered students go through online education on BoldBrows treatment.
