

At the personal request
of your skin

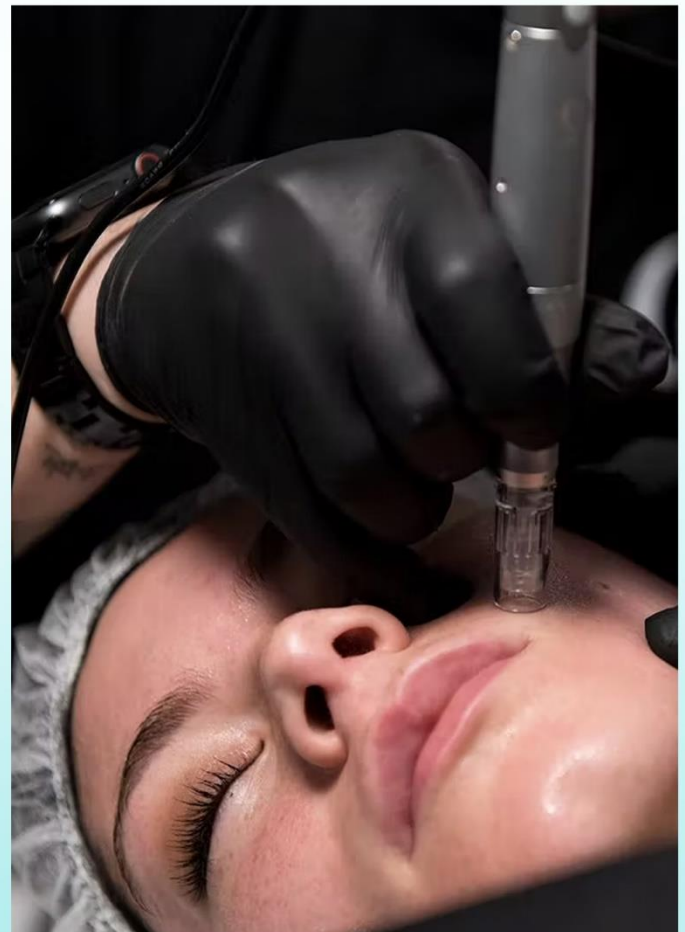

I studied software engineering in Iran and I always tried to teach others what i have learned. Even though I had a degree in computer engineering from a Dutch university, I decided to start with a field that would earn me more. I decided to join the PHI family and worked hard and unstoppable to reach my goal, and I'm finally there. now after a few years I have achieved all my wishes and I have more than thousands of successful students.

What is Phi Bright Microneedling

In order to understand skin better and solve its problems in a more successful way, it is necessary to get acquainted with its real needs.

What is

PhiBright Microneedling training?

PhiBright Microneedling training is a special education at Phi Academy during which you will learn how to signal the body to start higher production of collagen and elastin with very small stings on the surface layer of the skin.

How long

does PhiBright training last?

PhiBright Microneedling training begins with the one-day live training that consists of two parts:

part 1

Theoretical part: how to prepare the client, what PhiBright Microneedling course includes, a course on hygiene, skin structure theory and characteristics of certain parts of the skin of the face and body, ways to determine different skin types as well as recognizing characteristic changes in the skin, introduction to tools and devices to be used for treatment, appropriate care after treatment.

part 2

Practical part: working on a live model.

What after?

After the live training, participants gain access to the Craftmaster online learning platform, where all registered students go through online education on PhiBright Microneedling treatment.
